

# Finding & managing out-of-policy data

Industries, Functions & Roles:

- All Industries
- Legal
- DPO
- Data Governance

## > The business challenge

Data protection policies will have been written and communicated as part of GDPR compliance activity. However, it's very hard to know how often policy is being adhered to and whether employee adherence is putting the organisation at risk.

## > Solving the business challenge with Exonar Reveal

1. Use Exonar Reveal to discover your data and find where it is
2. Create Queries to identify out-of-policy data
3. Automate searches using Exonar Reveal workflows
4. Monitor adherence to policy over time
5. Measure & improve compliance to policy

“ We looked at several software technologies... but Exonar's software clearly offers us the most agile and effective data discovery approach.

DPO, Large Transport Company

## > The cost of not knowing your data

Assuming an average Global Annual Turnover of \$6.95B (£5B) for large organization:

\*Exonar Analysis, August 2020. £6.5\*M
